STYLE

Style is something that's unique to everyone. Which is why design choices for your home need to connect closely with your own personal taste. That's where Unilock® can help.

Only Unilock has the widest selection of exclusive products to help you create your own custom one-of-a-kind outdoor spaces.

Choose from a vast array of styles - everything from pavers cast from actual cobblestones found in historic European village streets, to the sleek modern lines and random color dispersion of granite-like slabs.

We have the best selection to express any style – it's why Unilock is the preferred choice for design professionals and homeowners alike.

UNILOCK OFFERS YOU

- A designer-inspired color palette
- Sleek, contemporary styles with clean lines
- Vintage stone and weathered brick textures
- A vast array of shapes, sizes and laying patterns
- Some of the largest format sizes available on the market today
- Compatible borders, insets and accents
- Matching products for walls, steps, seating and pillars

THE FRONT OF YOUR HOME

ADDING CURB APPEAL

It's no secret. Realtors will tell you that homes with great entrances sell faster and for more money. Consider making simple yet unique changes to your design by incorporating a border, planters, seat walls and pillars.

COMPLEMENT YOUR HOME

When choosing textures and colors, think of your home's exterior as your stage. Consider replicating, augmenting and complementing certain features of your existing architecture. Our life-size Uvision™ color swatches can help you decide which products best suit the current style of your home. Order your swatches online at Unilock.com.

ELEMENTS OF DESIGN

Scale. Proportion. Function. These are the elements of a great front entrance design. Remember, a front walkway should never be less than 4 feet in width at any point. The walkway should extend the full length of the driveway, to allow easy access from a parked car.

MAKE IT USER-FRIENDLY

Safety and practicality are also very important.

Consider adding lighting to your design with elements such as pillars with light fixtures, under-mounted step lighting or landscape lights. Lighting adds both class and functionality.

PAVING STONE DRIVEWAYS

THE RIGHT PRODUCT WILL LAST AND LAST

Driveways are subject to a lot of use and abuse by vehicles, people, equipment and chemicals such as de-icing salt. You need a product that is up to the job. Unilock products outperform other paving surfaces such as asphalt, poured concrete and stamped concrete. In addition, Unilock has pavers that repel dirt, oil and even chewing gum!

COMPLEMENT THE DESIGN OF YOUR HOME

A Unilock' driveway enhances the curb appeal of your home and reflects pride of ownership. When choosing colors and textures, try to replicate, augment or complement the architectural features of your home. The size of a driveway is typically dependent on the width of your garage and curb cut-out at the street. A graceful flair at the street edge will allow cars to enter and exit with ease.

PERMEABLE: THE ENVIRONMENTAL CHOICE

Looking for an ecological solution that diverts water back into the ground? Interested in a rainwater harvesting system? Or is a large portion of your lot subject to periodic flooding? Then a permeable paving solution is for you. Unilock offers many permeable pavers with EnduraColor™ and EnduraColor™ Plus finishes, so you don't have to compromise style. (Specialized base preparation and installation techniques are required.)

BORDERS AND ACCENTS

A narrow border can give a small driveway a finishing touch while wide borders and banding can help a large driveway feel less overwhelming. All EnduraColor™ Plus pavers are ideal for creating accents or borders.

POOL DECKS

DESIGN CONSIDERATIONS

amount of furniture you will need.

A well planned pool deck can make all the difference. If you have the opportunity, carefully plan your design before the pool is installed. For basic pool access, a 4-foot perimeter is sufficient. However, if you intend to use the pool deck as a patio for entertaining or sunbathing, consider a larger size to accommodate the

Consider elevation to plan steps, multilevel areas and retaining walls. Drainage should always be away from the pool and your home. In areas where it's difficult to grade the pool decking, we recommend that you install drains that will transport excess rainwater to an appropriate location.

LIGHTING AND WATER FEATURES

Lighting is a great way to highlight paver textures and provide additional safety.

Take your designs to the next level with unique water features that add visual drama and audible benefits; there's nothing more relaxing than the sound of a gentle waterfall.

SELECTING THE PERFECT PRODUCT

Pool pavers should provide a non-slip surface and be light in color so the surface remains cool enough to walk on.

Inset borders can be used to define the pool edge and to complement the colors of your home.

Pool coping is the edge closest to the water. Although almost any Unilock* paver can be used as a coping, there are some which are more suitable than others. Brussels Fullnose™ and Ledgestone™ are great choices because they don't have abrasive edges. Consider a contrasting color for your coping to help define the pool edge.

OUTDOOR LIVING

DESIGN WITH YOUR LIFESTYLE IN MIND

As you begin your project design, think about how you want to use the space. Do you love to entertain large gatherings of friends or just an intimate few? Is outdoor cooking your passion? Are you looking for a quiet oasis to read in? Or do you just want to gaze at your garden? Does the perfect evening include watching the flames in a fireplace or fire pit? Perhaps you'd prefer to watch the game on an outdoor TV. Make a list of all your "must-haves".

CREATE 'OUTDOOR' ROOMS

Cooking, dining, entertaining and relaxing; each requires a distinct space. You can define these spaces by changing the elevation with 1 or 2 steps, using complementary pavers for each area or by using banding to break up the areas. Seat walls are another excellent way to create this separation. They also provide added seating for large gettogethers and eliminate the need for extra furniture.

ENHANCE THE HORIZONTAL SURFACE

Add drama and interest to the floors of your outdoor rooms with patterns that create the look of an 'area rug' under furniture groupings. Borders and inset lighting can also help to visually delineate steps. In cooking areas, or if you have children that are messy eaters, Umbriano® or Belpasso® are excellent choices. These products feature EasyClean™, an integral surface protection that prevents stains and makes clean up easy.

DRAMATIZE THE VERTICAL DIMENSION

By creating vertical dimensions in your design, you can truly transform a patio into an outdoor living area. Grill islands, fireplaces, water features, seat walls, planters and pillars add excitement and style to an outdoor room. Repeating accents from the horizontal surfaces in the vertical surface creates a harmonious and unified design.

DESIGN IDEAS

This Design Ideas section contains a few of the infinite number of projects possible using Unilock® products. Use these photos to inspire ideas for your own project design or browse our online project gallery at Unilock.com for hundreds more.

PAVER AND WALL ACCENTS

Much like you would design a tile project inside your home, start by selecting a main paver and then consider complementing it with one or two accents. Beyond color combinations, we recommend experimenting with various border widths. For a completely harmonious design, plan your walls, pillars and grill islands to complement your paver selection. Incorporating the same color banding in the wall as used in the paver surface will bring the entire project design together.

Visit Unilock.com for additional border and accent ideas.

CREATION BEGINS WITH THE ELEMENTS

Unilock outdoor living elements are beautifully crafted vertical features, that come pre-built from the factory or can easily be built by a skilled contractor in your backyard.

CUSTOM SOLUTIONS

Custom designed solutions allow you to embellish with pavers, making it easy to match your patio borders and banding for that cohesive look and feel.

FEATURES:

- Installs in less time
- Built to exacting standards
- Coordinates beautifully with new or existing Unilock® paving stones
- Built with UL-approved fireboxes and grills (gas units available)

Create custom fireplaces, grill islands, brick ovens, bars, water features, fire pits, fire tables, pillars and more...

Jointing sand is used to fill the space between stones to lock up the pavers and prevent movement. By changing the jointing sand color, you can dramatically change the look and feel of your paver surface. To envision your paver choice with different sand color options, visit Unilock.com and watch how small details like this make a big difference.

BASIC JOINTING SAND

Ordinary paver jointing sand can be used but performs best when stabilized using a joint stabilizing sealer.

POLYMERIC SAND

Polymeric sand is a combination of sand and binder specifically formulated for optimum paver lock up. This product is appropriate for most pavers but must be used with care to prevent hazing on finer surfaces. Speak to your contractor to be sure that polymeric sand is appropriate for the pavers you have chosen.

UNILOCK EASY-PRO™

Unilock Easy-Pro is the ultimate paving stone joint compound. This no-haze, epoxy resin product is puncture resistant, permeable and eco-friendly (made with 60% renewable products). This product is ideal for pavers with wide joints but is not recommended for all applications. Speak to your contractor to be sure that Unilock Easy-Pro is appropriate for the pavers you have chosen.

PREVENTING WEED GROWTH

Weeds do not come from underneath the pavers. They come from seeds that blow into the joints from adjacent properties and germinate. The best way to prevent weed growth is to ensure that joints remain full of a solid jointing compound.

THE CHOICE OF THE BEST

CONTRACTORS & CRAFTSMEN

Like a good artist needs the right paint, the best contractors use the Unilock* palette of exclusive colors, textures and styles to showcase their creativity and workmanship. These artisans trust Unilock to continue to provide the tools they need for cutting edge design and installation standards that set them apart.

WE RECOMMEND THE USE OF PROFESSIONAL LANDSCAPE CONTRACTORS FOR YOUR PROJECT

You're making an important investment in your home. Don't let poor workmanship turn your ideal plan into a disappointment. Proper site preparation with the correct grading, base material and compaction is key to ensuring that your new patio or driveway looks great and stays even and safe for years to come.

The majority of installation costs are typically ground preparation and labor, so opting for a premium quality paver won't significantly increase the overall cost.

NEED A CONTRACTOR? Contact us online or at 1-800-UNILOCK and we would be happy to connect you with a local Unilock* Authorized Contractor.

WHAT TO EXPECT:

- A written quote for your project
- A detailed drawing and/or computer rendering of your project containing all the features that you requested
- Approximate start date and a reasonable estimate of the time required to do the job
- References from homeowners with similar projects
- A written confirmation of your contract with an installation guarantee clearly stated
- Proof of liability insurance and workers compensation coverage

When comparing quotes, make sure that you compare on an apples-to-apples basis and understand service levels; lowest price is typically not the best choice.

QUALITY ASSURED

PRODUCT QUALITY

Unilock® manufacturing teams have an unrelenting commitment to shipping only top quality products.

UNILOCK PRODUCTS ARE:

- Tested carefully from raw materials to finished product
- Tested hourly for product density
- Designed to meet all dimensional tolerances
- Inspected by dedicated quality control staff
- Above industry quality standards (ASTM & CSA)
- Made with colorfast pigments
- Durable and slip-resistant
- Resistant to salt erosion and chlorine
- Designed to tolerate oil or gas spills

Our world-class production facilities are renowned for their safety and cleanliness and are staffed with the most experienced production people in the industry. Our continual investment in the most technologically advanced equipment ensures we're able to provide the best in product quality, consistency and design.

TRANSFERABLE LIFETIME GUARANTEE

Unilock provides a Transferable Lifetime Guarantee on the structural integrity of our paving stones, slabs and retaining wall units for residential use. Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Color matching cannot be guaranteed and replacement labor is not included.

Registration is required, visit Unilock.com.

ENDURACOLOR*

EnduraColor products deliver durability through a perfect union: long-lasting color united with permanent strength.

The top portion of each stone is engineered with concentrated color and special wear-resistant materials. This is permanently united with the stone's base - a sturdier, coarser foundation designed for remarkable strength.

ILLUSTRATION OF INCREDIBLE DURABILITY IN EXTREME CIRCUMSTANCES.

ENDURACOLOR PLUS TORTURE TEST

BEFORE

When immersed in a bath of muriatic acid for 5 minutes, the surface of a standard paver deteriorates while EnduraColor Plus remains as beautiful as ever.

The above example is Umbriano*. See all EnduraColor Plus Torture Tests at Unilock.com.

LOOK FOR THESE ADDITIONAL TECHNOLOGIES IN ENDURACOLOR PLUS ARCHITECTURAL FINISHES:

Reala™ Surface Technology

Ultra-realistic textures cast from natural stone, brick and historic cobblestones.

ColorFusion™ Technology

A proprietary technology that disperses color randomly for a natural, granite-like appearance.

EasyClean™ Stain Resistance

An integral surface protection that allows for easier cleanup of spills when they happen, and before a stain can develop.

TitanTec™ Surface Technology

A proprietary technology that makes the surface virtually impenetrable to dirt, grease and oils.

Ultima™ Concrete Technology

For heavy traffic loads, this proprietary manufacturing process creates pavers and walls with up to four times the strength of poured concrete.

EnduraColor™ Plus Architectural Finishes promise long-lasting beauty through a proprietary blend of exclusive and superior ingredients.

A complex blend of granite and quartz, some of nature's highest performing minerals, are combined with non-fading color pigments that hold fast under UV light and extreme weather conditions. This combination is used to create ultra-realistic surface textures and unique style options that are exceptionally durable.

A NEW STANDARD FOR EVERLASTING BEAUTY.

BELPASSO®

Belpasso outperforms any other paver surface when it comes to surface wear, color retention and its ability to repel even the nastiest staining substances, including strong acids. Belpasso is ideal for walkways, patios or pool decks, and can be used in driveways if the correct sizes and laying patterns are used.

This is permanently united with the stone's base – a sturdier, coarser foundation designed for remarkable strength.

THE RESULT IS AN EXCEPTIONALLY STRONG STONE WITH COLOR THAT ENDURES.

The long, clean lines of new Artline reflect an emerging trend to minimalist, modern outdoor designs. Look for Artline in an exclusive number of colors that can be used separately or combined together to create graphic interest.

PERMEABLE PAVERS (2)

Unilock® has been on the forefront of permeable paving in North America with European alliances that have allowed us to look into the future of how rainwater is captured, retained and managed for growing urban areas.

Originally a commercial endeavor, permeable paving is becoming an important residential best practice. Permeable paving is important for two main reasons: first to ensure that ground water levels are restored and/or maintained, and secondly, to harvest rainwater for use in irrigation and other household uses.

Town Hall offers an attractive time-worn appearance, cast from original brick street pavers, and the eco-friendly benefits of a permeable paving system.
